**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 3-34, 45-48, and 76-81, drawn to disassembly of data, classified in class 370, subclass 474.
  - II. Claims 2, 53, and 64-72, drawn to determining network parameters, classified in class 370, subclass 252.
  - III. Claims 35, 54, and 55 drawn to routing data, classified in class 370, subclass 351.
  - IV. Claims 36-43, 56-63, and 73-75, drawn to network managing, classified in class 709, subclass 223.
  - V. Claims 44 and 49-52, drawn to synchronizing, classified in class 370, subclass 503.
2. Inventions I-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as disassembly of data, invention II has separate utility such as determining network parameters, invention III has separate utility such as routing data, and invention IV has separate utility such as network managing, invention V has separate utility such as synchronizing. See MPEP § 806.05(d).

Art Unit: 2663

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other group, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Christopher Dervishian on April 18, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
